and Security

Easy To Use Services Tailored To Your Trust

Schools Broadband is a specialist Internet Service Provider to Multi Academy Trusts of all sizes. We deliver fast, secure connectivity, Wide Area Networks, filtering, and security services to entire trust estates regardless of geographic location.

Whether you procure your services centrally, or academies purchase locally, our hosted education-specific service delivers the same high-standard web filtering and security to all your trust's schools ensuring every academy meets DfE compliances.

Through our high-speed Wide Area Networks, visibility of all network activity, firewall and web filtering policies, safeguarding alerts and reports can be managed either centrally or at academy level if preferred.

No capital funds required

Maintain Safeguarding Compliance Across All Your Schools

Every one of your students across each of your schools will be safeguarded against inappropriate online content by one of the most advanced education specific web filters available.

Filtering billions of categorised URLs and providing dynamic reports and alerts on suspicious searches, this unique hosted service confidently meets every safeguarding lead's requirements.

In addition, you can now choose to have our Safeguarding Incident Management Platform, where real-time alerts help bridge the divide between online pupil behaviour and the real world. And because your service is hosted on our unique education platform, you can easily scale all your services as your trust grows, without any additional upgrade or hardware costs.

Secure Peace of Mind With The World's Best Security

Our hosted security service is built on world-leading carrier grade technologies, with one single system combining firewalls, intrusion prevention, antivirus, antispam and application control.

With real-time updates to protect against the latest and most advanced, persistent threats, together with our advanced Anti-DDoS Protection, included as standard, none of our schools have suffered an outage since 2019 due to an attack.

Ours is an affordable yet higher grade solution, able to connect any number of schools, regardless of their location, to the most advanced and cost-effective security services available.

Securing and protecting schools and Multi Academy Trusts is what we are known for, it's what we excel in and it's why we have received the ISPA Award for Best Cloud Service and Security multiple times.

Meet DfE, KCSiE and Prevent Duty compliance seamlessly across your Trust

A Note About VoIP Phone Services

BT's national withdrawal of phone lines means everyone in the country must switch to a VoIP phone service soon, if you haven't already.

This type of phone service couldn't be better for Multi Academy Trusts. With our Wide Area Networks, Trusts benefit from free site to site communication throughout your entire school network, plus there are many additional useful features to improve and streamline your communication. There are also significant savings to be made on call charges, line rentals and system maintenance. Ask to speak to our VoIP specialist for further assistance.

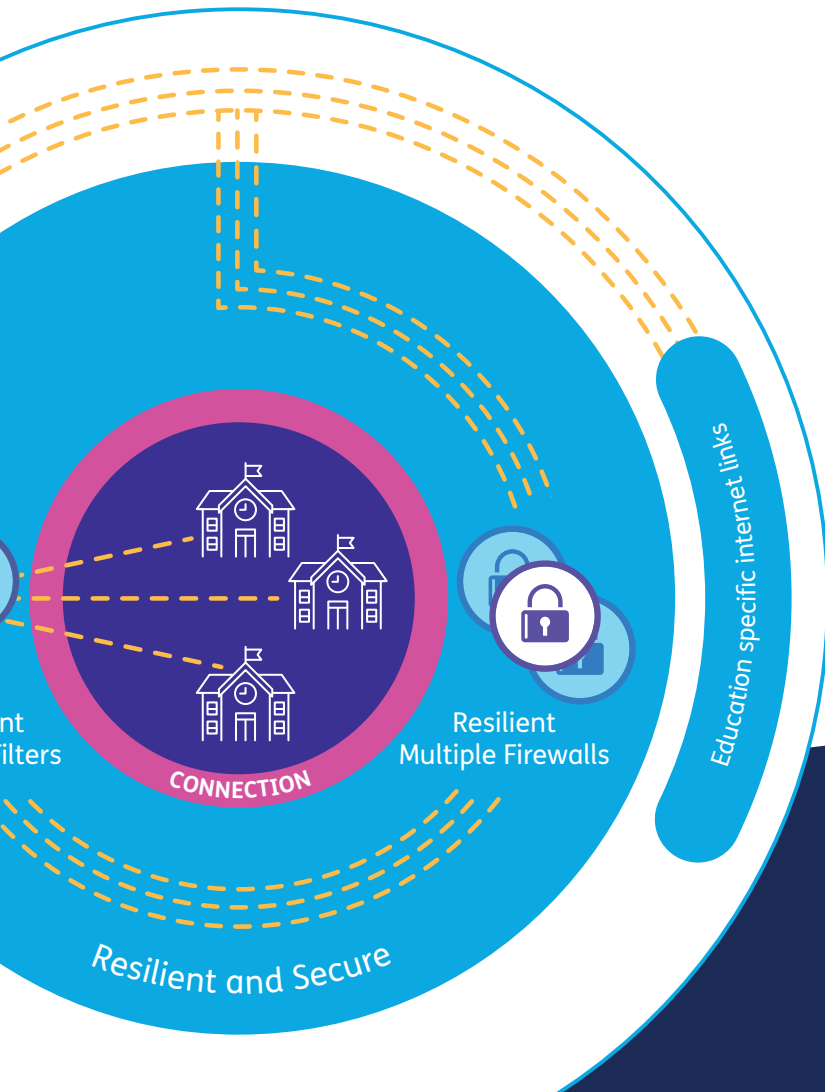

Transform Your MAT IT Infrastructure With Zero Capital Funding

Schools Broadband is transforming Multi Academy Trust IT infrastructures. We're reducing infrastructure costs, improving trust-wide filtering, safeguarding and security and enabling improved standards across whole trusts.

Based on operating expenditure only, with no accumulation of capital funds, our service provides access to cutting-edge technology that wouldn't otherwise be in financial reach of most schools.

If you would like more information, an informal discussion, or a quotation for any of our services, please contact us, we're happy to help.
